

ONIEL ALEJO FELIZ

FULL-STACK DEVELOPER

Tampa, FL | [656-200-7791](tel:656-200-7791) | Onielbf10@gmail.com | [Portfolio](#) | [GitHub](#) | [LinkedIn](#)
U.S. Permanent Resident | No employer sponsorship required

PROFESSIONAL SUMMARY

Full-stack developer who builds and deploys dependable web products across React and Next.js interfaces, TypeScript and Node.js services, and PostgreSQL data systems. Built and deployed four portfolio products and contributed three merged changes to established open-source repositories, with strengths in authorization, reliable background processing, accessibility, automated testing, and release validation.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, SQL, HTML, CSS

Frontend: React, Next.js, Tailwind CSS, responsive design, web accessibility

Backend & Data: Node.js, Hono, REST APIs, PostgreSQL, Prisma, Supabase, Auth.js, Cloudflare Workers, D1, Queues

Testing & Delivery: Vitest, Testing Library, Playwright, pgTAP, GitHub Actions, Docker, Git, Vercel

ENGINEERING EXPERIENCE

Open-Source Contributor | Independent | 2026-Present | [Reticle PR #278](#) | [BlueHex PR #29](#) | [Maka PR #2989](#)

- Merged route-learning persistence into Reticle's TypeScript monorepo, including concurrent-safe project-state updates, crawl and navigation integration, and 23 focused tests; passed maintainer review and upstream CI.
- Added BlueHex production-build Playwright and accessibility coverage, then fixed Apache Maka's unbounded MCP tool rediscovery behavior; both changes were merged after maintainer feedback and upstream validation.

AI Training Contributor | Outlier | Remote | Jul 2024-Feb 2025

- Completed varied AI-training tasks under detailed, changing evaluation criteria, applying independent written reasoning and consistent quality-control practices.

Computer Repair Technician | Local Computer Repair Shop | 2024 | 6 months

- Diagnosed operating-system, application, and hardware failures; repaired computers and explained practical solutions clearly to customers.

SELECTED ENGINEERING PROJECTS

Relay | Webhook Delivery Platform | 2026 | [Live](#) | [Source](#)

- Built and deployed a TypeScript webhook platform on Cloudflare Workers, D1, and Queues with durable scheduling, HMAC-signed requests, idempotent ingestion, deterministic retries, lease recovery, and AES-GCM encrypted endpoint secrets.
- Created an operational console and controlled Failure Lab demonstrating seven success and failure paths; validated 304 release checks across application, contract, configuration, security, and browser coverage.

Next | Real-Time Queue System | 2026 | [Live](#) | [Source](#)

- Engineered synchronized customer, staff, and public-display experiences with Next.js, Supabase Realtime, PostgreSQL RLS, transactional RPC commands, revisioned events, and authoritative snapshot recovery.
- Enforced database-owned authorization, idempotent commands, concurrency control, private-data isolation, and reconnect recovery; validated with unit, pgTAP, isolated-client, Realtime, Playwright, and production smoke coverage.

CareerFlow | Career Management Platform | 2026 | [Live](#) | [Source](#)

- Built and deployed an authenticated Next.js application with account-scoped application tracking, deadlines, search and filters, dashboard metrics, and relational resume-version management.
- Implemented Auth.js sessions, Argon2id password hashing, PostgreSQL and Prisma ownership enforcement, migrations, and a 179-test release-readiness baseline with browser QA.

EDUCATION & LANGUAGES

Software Development Studies | ITLA - Instituto Tecnológico de Las Americas, Dominican Republic | Coursework completed | English and Spanish
